# CONTENTS VOLUME 68 JUNE 1984

*page* 1 REED, W., AVOLIO, J. AND SATIR, P. The cytoskeleton of the apical border of the lateral cells of freshwater mussel gill: structural integration of microtubule and actin filament-based organelles

35 PEARSON, C. M. AND STYLES, J. A. Resistance of mouse lymphoma L5178YAII cells to alkylation with methylmethane sulphonate resides in a late step of excision repair

49 NAKATSUJI, N. AND JOHNSON, K. E. Ectodermal fragments from normal frog gastrulae condition substrata to support normal and hybrid mesodermal cell migration *in vitro*

69 JOHNSON, K. E. AND ADELMAN, M. R. Circus movements in dissociated cells from two new hybrid frog embryos

83 FLICKINGER, C. J. Altered labelling of the cell surface and intracellular organelles with [$^3$H]mannose in enucleated amoebae

95 GANGOPADHYAY, A. AND CHATTERJEE, S. A cell-cycle-phase-specific mutant of amoeba

113 MESLAND, D. A. M. AND SPIELE, H. Brief extraction with detergent induces the appearance of many plasma membrane-associated microtubules in hepatocytic cells

139 MCROBBIE, S. J. AND NEWELL, P. C. Chemoattractant-mediated changes in cytoskeletal actin of cellular slime moulds

153 DODD, N. J. F. AND KUMAR, S. Effect of tumour angiogenesis factors on the membrane of capillary and aortic endothelial cells: an e.s.r. spin-label study

163 COSSON, M. P. CARRÉ, D. AND COSSON, J. Sperm chemotaxis in siphonophores. II. Calcium-dependent asymmetrical movement of spermatozoa induced by the attractant

183 LEICHTNER, A. M. AND KRIEGER, M. Addition of a mannose-6-phosphate-containing oligosaccharide alters cellular processing of low density lipoprotein by parental and LDL-receptor-defective Chinese hamster ovary cells

195 JACQMARD, A., LYNDON, R. F. AND SALMON, J. Appearance of specific antigenic proteins in the maturing sexual organs of *Sinapis* flowers

211 MILLIKIN, B. E. AND WEISS, R. L. Localization of concanavalin-A-binding carbohydrate in *Chlamydomonas* flagella

227 HASTON, W. S. AND SHIELDS, J. M. Contraction waves in lymphocyte locomotion

243 FUJISAWA, T. AND DAVID, C. N. Loss of differentiating nematocytes induced by regeneration and wound healing in *Hydra*

257 WHITE, M. K., BRAMWELL, M. E. AND HARRIS, H. Alterations induced by glucose deprivation and tunicamycin in the kinetic parameters of hexose transport in hybrid cells

271 SHAW, P. J. AND HILLS, G. J. The three-dimensional structure of the cell wall glycoprotein of *Chlorogonium elongatum*

285 GOSS, S. J. Arginine synthesis by hepatomas *in vitro*. I. The requirements for cell growth in medium containing ornithine in place of arginine, and the isolation and characterization of variant hepatomas auxotrophic for arginine

305 GOSS. S. J. Arginine synthesis by hepatomas *in vitro*. II. Isolation and characterization of Morris hepatoma variants unable to convert ornithine to arginine, and modulation of urea-cycle enzymes by dexamethosane and cyclic-AMP
